

Your Garden Planner

Our simple planner will help you plan the square meters you need for your garden.

Use the blank grid template to help you work out how many rolls you will need. Position the rolls so that you have a minimum number of joints. Allow some extra grass length for a small amount of wastage, especially if working on curved corners. The wastage will depend on the design of your garden and how you plan to lay the rolls.

Our grass is supplied in either 2m or 4m widths with a roll length of up to 25m. Remember for best results the rolls must be laid in the same direction.

An example of a plan is shown below:
